Johannesburg, South Africa | +27 79 291 8104 | [nnosiphosm@gmail.com](mailto:nnosiphosm@gmail.com) | [linkedin.com/in/nosipho-mabuza](https://www.linkedin.com/in/nosipho-mabuza)

*GitHub: add GitHub profile link | Portfolio: add portfolio website link*

Entry-level software developer with hands-on experience in Java/Android mobile development, PHP/MySQL web development and IT support. Skilled in building user-facing screens, authentication flows, CRUD features, database integration and admin workflows, with practical experience supporting users with software, hardware, printers and basic networking. Currently completing a Bachelor of Computer Science in Software Engineering and open to remote, international and South African junior developer, mobile/web development and application support opportunities.

### TECHNICAL SKILLS

**Programming:** Java, PHP, SQL, JavaScript, HTML, CSS

**Mobile Development:** Android screens, navigation, user flows, testing and debugging

**Tools & Frameworks:** Android Studio, Bootstrap, jQuery, XAMPP, Git/GitHub basics

**IT & App Support:** Software installation, drivers, printers, hardware support, troubleshooting

**Database & Backend:** MySQL, CRUD operations, authentication, database integration

**Professional Skills:** Problem-solving, teamwork, communication, documentation, project planning

### EXPERIENCE

#### IT Support Assistant

##### Kuvuswa Izwe | 2024 - 2025

- Provided day-to-day IT support to office users, including software installation, driver setup, printer connectivity and computer troubleshooting.
- Assisted with hardware and peripheral support for desktops, laptops, printers and basic network connectivity issues.
- Supported users with Microsoft Office applications, general computer issues and technical guidance.
- Helped maintain office computers through basic updates, software configuration and system checks.
- Documented and escalated technical issues where required.

### PROJECTS

#### Dragon Stone E-Commerce Website | PHP | MySQL | HTML | CSS | Bootstrap | JavaScript/jQuery

**Live Website:** *add hosted Dragon Stone website link here*

**GitHub Repository:** *add Dragon Stone GitHub repository link here*

- Developed a full-stack e-commerce website for sustainable home, personal care and lifestyle products.
- Built product browsing, categories, user registration/login, cart/order functionality and admin-side management features.
- Implemented CRUD functionality for products, categories, users and orders using PHP and MySQL database storage.

#### Grade A Media Booking Application | Android Studio | Java | Mobile Application Development

**GitHub Repository / Demo:** *add project repository or demo link if available*

- Assisted in developing a mobile booking application for an audio and visual rental company using Android Studio and Java.
- Worked on frontend screens, navigation, authentication, database integration and admin-side workflows.
- Collaborated within a development team using project management and software engineering principles.

### EDUCATION

#### Bachelor of Computer Science - Software Engineering

**Eduvos | Expected completion: November 2026**

##### Selected modules and achievements

- |                                                     |                               |
|-----------------------------------------------------|-------------------------------|
| • Mobile Application Development and Big Data - 87% | • Mathematics 1A - 83%        |
