

NOSIPHO MABUZA

JUNIOR SOFTWARE ENGINEER | JAVA, ANDROID, PHP/MYSQL & FIREBASE

Johannesburg, Gauteng | 079 291 8104 | nnosiphosm@gmail.com | [linkedin.com/in/nosipho-mabuza](https://www.linkedin.com/in/nosipho-mabuza)
GitHub: github.com/NolwaziMabuza | Portfolio: nosiphomabuza.github.io/NosiphoMabuza-portfolio-website

Final-year Bachelor of Computer Science student specialising in Software Engineering with practical experience in Java/Android mobile development, PHP/MySQL web development, Firebase, database integration and software project documentation. Skilled in building user-facing screens, authentication flows, CRUD features, admin workflows, testing and debugging. Open to internships, graduate programmes, junior software developer, mobile/web development, QA testing and software project opportunities.

TECHNICAL SKILLS

Programming: Java, PHP, SQL, JavaScript, HTML, CSS

Tools & Frameworks: Android Studio, Bootstrap, jQuery, XAMPP, Git/GitHub basics

Database & Backend: MySQL, Firebase, CRUD operations, authentication, database integration

Mobile Development: Android screens, navigation, user flows, validation, testing and debugging

Software Engineering: Requirements analysis, documentation, UI planning, testing, teamwork and project planning

Technical Support: Software setup, drivers, printers, hardware support, troubleshooting and basic networking

EXPERIENCE

IT Support Assistant

Kuvuswa Izwe | 2024 - 2025

- Provided day-to-day IT support to office users, including software installation, driver setup, printer connectivity and computer troubleshooting.
- Assisted with hardware and peripheral support for desktops, laptops, printers and basic network connectivity issues.
- Supported users with Microsoft Office applications, general computer issues and technical guidance.
- Helped maintain office computers through basic updates, software configuration and system checks.
- Documented and escalated technical issues where required.

EDUCATION

Bachelor of Computer Science - Software Engineering

Eduvos | Expected completion: November 2026

Selected modules and achievements:

- Mobile Application Development and Big Data - 87%
- Enterprise Programming in Java - 82%
- Data Structures and Algorithms in Java - 80%
- IT Project Management - 77%
- Mathematics 1A - 83%
- 4IR Technologies - 71%

PROJECTS

Dragon Stone E-Commerce Website | PHP | MySQL | HTML | CSS | Bootstrap | JavaScript/jQuery

Live Website: dragonstoneecommercenosipho.site/?i=1

GitHub Repository: github.com/NolwaziMabuza/dragonstone-ecommerce-website

- Developed a full-stack e-commerce website for sustainable home, personal care and lifestyle products.
- Built product browsing, categories, user registration/login, cart/order functionality and admin-side management features.
- Implemented CRUD functionality for products, categories, users and orders using PHP and MySQL database storage.
- Hosted the project online and linked the public GitHub repository for portfolio review.

Grade A Media Booking Application | Android Studio | Java | Firebase | XML Layouts

GitHub Repository: github.com/NolwaziMabuza/GradeAMediaBookingAppFinal

- Worked as project manager, main developer and documentation lead for a mobile booking application for a media equipment rental business.
- Built and fixed Android app screens, user flows, navigation, validation, Firebase-connected functionality, testing and debugging.
- Prepared project documentation and walkthrough evidence covering login, browsing/search, cart, checkout and full system flow.

Software Engineering Portfolio Website | HTML | CSS | JavaScript | Responsive Design

Live Portfolio: nosiphomabuza.github.io/NosiphoMabuza-portfolio-website

GitHub Repository: github.com/NolwaziMabuza/NosiphoMabuza-portfolio-website

- Built a responsive portfolio website to present projects, skills, CV documents, academic strengths and contact information.
- Structured project case studies for Dragon Stone, Grade A Media and the portfolio website.
- Hosted the site using GitHub Pages as a static website.

ADDITIONAL INFORMATION

Languages: English, Afrikaans, Sepedi and isiZulu. Comfortable working independently and within teams. Strong problem-solving, communication, leadership, documentation and teamwork skills.
